

Amendments to the Abstract:

The Abstract for the application appears on the front page of the PCT application. Applicant has rewritten the Abstract on to a separate page as is required for US practice. Further, Applicant has made amendments to the Abstract. A marked-up version of the Abstract is provided below, and a clean version is provided on page 11 of this Amendment.

Please amend the Abstract as follows:

The present invention provides an ~~An~~ electric motor movement controlling method, where the electric motor ~~is being~~ fed by a total voltage (V_T) proportional to the network voltage (V_{AC}); ~~the~~ The method comprising comprises steps of making a first measurement of level (V_{t10}) of the network voltage (V_{AC}) at a first moment of measurement (t_{10}) and making a second measurement of level (V_{t20}) of the network voltage (V_{AC}); at a second moment of measurement (t_{20}), calculating the value of the derivative of the values of voltage measured in function of the first and second moments of measurement (t_{10}, t_{20}), to obtain a value of a proportional network voltage (V_{AC}'), and altering the value of the total voltage (V_T) fed to the motor, proportionally to the value of the proportional network (V_{AC}'). A system that will implement the steps of the method of the present invention, as well as a compressor (~~14~~) comprising the system of the present invention are foreseen.
